

# CONNECTED LEARNERS

We are a school that continually looks outwards - at local, national and international levels, enjoying learning from rich learning communities far and wide. We also love learning from each other; we are inspired and encouraged by those who surround us every day.

Underpinning all of these connections are effective systems that enable us to share skills and knowledge and build leadership at all levels. Technology is the vehicle which allows us to connect at the touch of a button, offering limitless opportunities to share our successes in a 24/7 learning community.

Coaching, mentoring and regular collaboration help to connect learners with their learning, preparing them for their lifelong learning journey.
